Many children spend too much time 21 at home and quietly playing on a tablet. If children do not learn to stay with others, it can become much 22 for them to learn how to make friends when they get older.

It is 23 to know how to use tablets or telephones in today's world, but it is still very important for children to learn to make 24 with others. If they do, they can live 25 when they grow up. Teachers should help their students know how to live happily.

We, students, spend much time learning or doing homework. We do the same thing, look the same and feel the same. Are you ready for a change? Well, here are some ways that you can make your life more interesting.

First, you should set a goal (目标). When you have it, you will know where to go and your life will have a direction.

Then, find a way to make yourself relaxed. Some students like to listen to their favorite music when they feel tired. And other students love to eat delicious food to let them feel better. Sometimes talking with a good friend can also make you feel good. The way to make you happy is the best way.

Thirdly, do something for someone. Send someone an email to tell why you like them, or give someone a hand.

In the 1920s, the airlines were just beginning. It was unusual for people to travel by air because it was expensive and dangerous. In those days, there was no flight service to look after the passengers. Young men, or "stewards", helped the passengers onto the airplane and carried the passengers' luggage but they did not provide food or drinks. But then in 1930, a woman called Ellen Church invented the "stewardess".

Ellen Church was born in 1904 on a farm in Iowa. She was a different child. She didn't want to work on a farm or marry a farmer — she wanted a more exciting life.

Ellen studied to be a nurse at the University of Minnesota and then got a job in a hospital. For the next few years, she stayed at the hospital and at the same time took flying lessons and got her pilot's license.

When she was 25, she first got in touch with Boeing Air Transport. She loved flying but she understood that airlines were a man's world. But she had another idea. Most people were scared of flying because flying was not a safe way to travel. And many passengers would be sick. Ellen thought nurses could take care of passengers during flights and BAT agreed. The young woman from Iowa and seven other nurses became the first air stewardesses.

At first, pilots were unhappy because they did not want stewardesses on airplanes, but passengers loved them. In 1940 there were around 1 000 of them working for different airlines. The early "stewardesses" had to be under 25 years old, single and slim. When a woman joined an airline, she had to promise not to get married or have children.

In the 1970s, stewardesses were unhappy in their job and airlines had to make some changes. Since the 1970s, "stewardesses" have been called flight attendants. They are well paid and work fewer hours than in the past.
